

1. LW/2024/01

**Topic: DIGITAL MARKET AND E-COMMERCE (TAX CHALLENGES)**

Speaker: TBC

Moderator: Evgenia Papadopoulou (GR) Senior Judge, Administrative Court of Appeal of Thessaloniki, Vice President of the Association of European Administrative Judges (AEAJ), trainer in the Greek School of Judiciary

Date: 18 January 2024, 13.00-14.00 Brussels time

Portfolio: Administrative Law

Content: The presentation will focus on the new business models that have emerged due to the digitalization and globalisation of the economy and will explore the tax issues that arise from this shift. The topic will cover two areas:

First, the importance of the exchange of information and the increasing tax compliance burden that is imposed on online businesses to provide information to the tax authorities. The recent amendments to the mutual assistance directive (DAC7 and DAC8) will be critically presented, as well as recent and pending cases of the Court of justice on the relevant issues.

Secondly, the income tax issues that arise from the delocalization of business. The adoption of digital services taxes around the world is creating uncertainty. It is expected that disputes will arise regarding the compatibility of such taxes with EU law and from the interaction of digital services taxes with bilateral double tax treaties.

Main target group: Administrative Judges, Civil Judges, Criminal Judges

Learning outcomes: The expert's lecture will highlight the tax challenges that should arise from the digitalization of the economy and e-commerce in a rapidly changing world. It will provide the participants with necessary knowledge of the basic notions of the digital economy, the mechanism of its function and will help them understand tax complexity issues due to the acceleration of e-commerce (where to tax, what to tax etc.). Lastly it will upgrade their knowledge concerning the recent evolutions in the respective legal framework at the EU level and also at the international level.

## 2. LW/2024/02

### **Topic: AI and predictive Justice**

Speaker: TBC

Moderator: Stelios Bios, Activity Coordinator

Date: 01 February 2024, 13.00-14.00 Brussels time

Portfolio: Civil Law

Content: Join us for an insightful webinar as we delve into the realm of "AI and Predictive Justice." In an era where technology is transforming the legal landscape, this webinar aims to unravel the potential of artificial intelligence (AI) in shaping the future of justice. Our expert speakers will guide you through the intersection of artificial intelligence and predictive justice, exploring how advanced technologies can enhance legal decision-making processes. Gain a comprehensive understanding of the applications of AI in predicting legal outcomes, identifying patterns, and streamlining judicial procedures.

Main target group: Administrative Judges, Civil Judges, Criminal Judges

Learning outcomes: This webinar provides a unique opportunity to engage with experts in the field and gain valuable insights into the evolving relationship between artificial intelligence and the legal system.

## 3. LW/2024/03

### **Topic: Forensic reports in court and in Prosecution's Office**

Speaker: Alexandru Georgescu, Trainer at NIM.

Moderator: Monica Marti-Garcia EJTN

Date: 15 February 2024, 13.00-14.00 Brussels time

Portfolio: Criminal Justice

Content: The webinar aims to provide reliable and robust forensic evidence all the way from the crime scene to the courtroom which contributes to making law enforcement and judiciary in Europe more efficient and effective. Some areas of forensics are key for the future: Biometrics, AI, new tools for crime scene investigation, etc.

Main target group: Judges, Prosecutors and Court Staff

Learning outcomes: Participants will be able to understand how each piece of evidence collected from the crime scene investigation walks through the laboratory and finds its place in the final puzzle - the file on the judge's desk.

4. [LW/2024/04](#)

**Topic: Is the right to housing a fundamental right?**

Speaker: Professor Rui Tavares Lanceiro

Moderator: Fernando Duarte (PT) Administrative Court of Appeal of Oporto and Trainer at the Judicial School of Lisbon, Portugal

Date: 29 February 2024, 13.00-14.00 Brussels time

Portfolio: Human Rights and Fundamental Freedoms

Content: The goal of this Lunchtime webinar is to allow the participants to discuss the right to housing as a fundamental right, and what this means from the point of view of ensuring its implementation and guarantee.

Main target group: Judges, Prosecutors and Court Staff

Learning outcomes: The learning objectives of this training are:

- to reflect upon the law protection and promotion of the right to housing as a fundamental right in Europe Union
- to reflect on the principle of guaranteeing a minimum subsistence level with dignity, and the right to housing
- to serve as a forum to discuss if the principle of the social state and the right to human dignity include the right to have a place to live.

### **Topic: Using ChatGPT in Judicial Training**

Speaker: Arno Vinkovic, EJTN

Moderator: Dr Suzy Houston, Head of Education, Judicial institute for Scotland

Date: 28 March 2024, 13.00-14.00 Brussels time

Portfolio: Judicial Training Methods

Content: This session will provide you the overview on how to use ChatGPT in the training design. We will guide you through the entire journey of using ChatGPT with its main features needed to help you in the course design, show you the prompts to prepare the course descriptions, case studies, learning objectives and outcomes. Our goal is to show the current state of play of the AI tool and show its limitations.

Main target group: Trainers for judges, prosecutors and court staff, Course designers, representatives of national training institutions

Learning outcomes: By the end of this webinar, participants will be able to:

- Understand how ChatGPT works and what are how it can be used in building a training activity
- Learn how to use different prompts in ChatGPT to align with specific judicial education needs (descriptions, learning objectives/outcome and case studies)
- Explore real-world case studies showcasing successful implementations of ChatGPT in judicial training, with insights into best practices and potential challenges.

## 7. LW/2024/07

### **Topic: Immigrants and social fundamental rights**

Speaker: TBC

Moderator: Fernando Duarte (PT) Judge, Administrative Court of Appeal of Oporto and Trainer at the Judicial School of Lisbon

Date: 11 April 2024, 13.00-14.00 Brussels time

Portfolio: Administrative Law

Content: The goal of this Lunchtime webinar is to allow the participants to discuss the right of immigrants to social fundamental rights in the EU.

Main target group: Judges, Prosecutors

Learning outcomes:

-To reflect on the binding nature of social rights (the right to health, the right to social security, the right of protection of the elderly, etc) and on the access of third countries nationals' citizens to social rights within the European Union.

-To discuss on the principle of guaranteeing a minimum subsistence level with dignity, and its application to residents of the European Union national of third countries.

9. LW/2024/09

**Topic: ARTIFICIAL NARROW INTELLIGENCE How it Affects Crime Prevention, Prosecution and Punishment**

Speaker: Dr. Mariana Todorova, Associate Professor

Moderator: Angelina Lazarova-NIJ Bulgaria

Date: 9 May 2024, 13.00-14.00 Brussels time

Portfolio: Criminal Justice

Content: The rapid development of narrow artificial intelligence (ANI) disrupts all spheres of human life, provides exceptional opportunities, but also presents unprecedented challenges to crime prevention, prosecution and punishment. The webinar will answer the questions of how the nature of the crime and the essence of crime prosecution and punishment will change, and how it will become increasingly difficult legislation in criminal law to be created and functions precisely because of the impact of ANI and digital technologies. Specific case studies will be provided as well.

Main target group: Judges and Prosecutors

Learning outcomes: Participants will have the opportunity to build on their knowledge from the two workshops already held, learn about the latest trends in the impact of AI in Crime Prevention, Prosecution and Punishment and hear the speaker's predictions about possible developments in this area that would suggest solutions of emerging problems.

**Topic: AI and judicial decision-making**

Speaker: Giuliana Civinini

Moderator: Lorenza Calcagno (IT)

Date: 23 May 2024, 13.00-14.00 Brussels time

Portfolio: Human Rights and Fundamental Freedoms

Content: The webinar will concentrate the attention to the use of the AI systems in the field of justice. In particular, the following themes will be addressed, the subject of access to justice and of the so-called prediction technology or predictive justice, a way of applying the law exploiting the artificial intelligence, with the purpose of predicting the jurisdictional decisions by means of algorithms "trained" in the analysis of databases containing precedents and other useful information to increase the degree of legal certainty and the quality of the decisions. The seminar aims to address the use of artificial intelligence in judicial decision-making to enable a debate on the limits and opportunities of predictive justice in civil and criminal law. Many questions arise in this field. In particular, by focusing on current and planned future developments at European and national level, will be examined some crucial aspects of jurisdiction and the rule of law. Among the issues we can mention: - AI as an instrument for assessing how judge's do justice. - Algorithms as instruments and initiatives - eventually already implemented - of automatization for assisting in standard proceedings. - AI instruments for fastening and helping judges. - Constitutional issues. - The uses of AI in the judicial system for purposes other than predictive justice, supporting the judge's activity, organising the judge's activity, producing the judicial decision as example.

Main target group: Judges, Prosecutors and Court Staff

Learning outcomes: The presentation aims to inform participants about the specific difficulties that the use of artificial intelligence creates in the field of justice. Alongside the cognitive aspect, the presentation is intended to encourage discussion on the usefulness and difficult profiles that these tools encounter in the process of judicial decision-making, given the specific relevance of the protection of fundamental rights in jurisdiction and respect to the rule of law.

12. LW/2024/12

**Topic: Psychological aspects of leading change**

Speaker: Rik Simms, Education and Development Advisor, Judicial College UK

Moderator: Eva Krejčová, Judicial Academy (CZ), EJTN JTM Leadership Project Team Leader

Date: 20 June 2024, 13.00-14.00 Brussels time

Portfolio: Judicial Training Methods

Content:

- Introduction to the brain's response to change and unexpected situations.
- How our brain's responses affect our behaviour during change.
- The problem with leading change.
- Understanding individual and group behaviour and mindset.
- Useful models for leading change.

Main target group: Court/ Prosecution Offices Managers and Leaders, Trainers.

Learning outcomes:

- Anticipate and plan for the common psychological responses to change.
- Reflect on their own responses to change and take positive action to manage them.
- Devise communications and interventions that will encourage people to move through change.
